Summary

My current research is focused on trying to inculcate key strengths of ***symbolic AI*** *techniques, like* ***domain knowledge adherence, logical coherence****, etc., into* ***deep learning*** *systems. Addition of logical constraints and pre-existing knowledge not only makes these systems more aligned to critical applications but also makes them more data efficient. This problem shows up in many domains and thus leads me to work in several fields like natural language, medicine, biology, astrophysics and diverse business applications.*

I am a final year PhD candidate at the Computer Vision and Pattern Recognition Unit, **Indian Statistical Institute, Kolkata** working under the supervision of **Prof. Utpal Garain**.
