Summary

I am a *senior research fellow* at **ISI Kolkata**, working under the supervision of **Prof. Utpal Garain**. My research centers on enhancing deep learning systems with the strengths of symbolic AI techniques for greater logical coherence and domain constraint adherence. While my primary focus is natural language processing, I actively collaborate across domains including vision, medicine, biology, astrophysics, and business applications.

My doctoral dissertation titled “**Domain Obedient Deep Learning**” is *under review*. My ongoing research focusing on alignment of large language models has recently been supported by an *OpenAI Computational Credit Grant*.
